

Dear patients and visitors,

As part of the Nepean Redevelopment, upgrades to the Nepean Cancer Care Centre will start soon to meet current demands for cancer services at Nepean Hospital.

This will include increasing the number of chemotherapy treatment spaces from 15 to 30, and constructing a third radiotherapy bunker.

Early site investigations will begin at the start of May 2018, and fencing will be installed around the perimeter of the Nepean Cancer Care Centre for the safety and security of everyone on site.

It is important to note that there will be **no immediate changes to cancer services, building access or parking during this period.**

If any changes are required at a later date, suitable notice will be given to minimise disruptions to patients, visitors and staff.

More information will be provided as the project progresses.

We appreciate your patience and support as we progress this important project.
